ADOPTION CREDIT

Question 1. My clients went to Russia and completed all the requirements there to allow an unadopted Russian child to leave the country with them. This occurred in 2001. The adoption was finalized in the U.S. in August 2002 when the county circuit court approved the adoption decree. Can all of the adoption expenses paid in 2001 and 2002 be reported on the 2002 Form 8839 (Qualified Adoption Expenses)?

Answer 1. Yes. The adoption expenses are not “qualified adoption expenses” until the adoption becomes final. (I.R.C. §§23(e) and 137(e)). The adoption is finalized when it is approved by a U.S. court or other appropriate U.S. authority.

Example. Tom and Judy Green adopted a Russian child, Sophia. The adoption process began in April 2001. They made two trips to Russia in 2001 and satisfied all Russian laws and requirements in order to take Sophia out of Russia. They brought Sophia to their home in December 2001.

The county circuit court approved the adoption in August 2002 following the mandatory 6-month waiting period. Tom and Judy paid the following qualified adoption expenses:

<table>
<thead>
<tr>
<th>Year Paid</th>
<th>Amount of Qualified Adoption Expenses Paid</th>
</tr>
</thead>
<tbody>
<tr>
<td>2001</td>
<td>$13,000</td>
</tr>
<tr>
<td>2002</td>
<td>3,000</td>
</tr>
<tr>
<td>Total</td>
<td>$16,000</td>
</tr>
</tbody>
</table>

Note. The adoption credit limit is $10,000 for 2002.
Their completed Form 8839 is shown below:

BUSINESS GIFTS

Question 2. One of my business clients, a self-employed sales representative, gives Christmas gifts of English biscuits and chocolates to her best customers. Is the cost limited to 50% as business-related entertainment or is it considered a gift subject to the $25 per person per year limitation?

Answer 2. It is a gift, subject to the $25 per person limit, not a business-related entertainment item. The 50% limitation does not apply.

8% CAPITAL GAINS TAX RATE

Question 3. Regarding the 8% capital gains tax rate on 5-year gains: Does all other income use up taxable income before considering qualified 5-year gains?

Answer 3. Yes. If a taxpayer’s taxable income excluding 5-year gains is in excess of the ceiling for the 15% bracket, none of the 5-year gains will be taxed at 8%. Instead, they will be taxed at 20%.

Only 5-year gains that are within the 15% tax bracket (including other income) in 2001 and later years are eligible for the favorable 8% tax rate. Once the 15% tax bracket is used up (taxable income exceeds the ceiling for the 15% bracket), any remaining 5-year gains will be taxed at 20%.

The key to taking advantage of the 8% capital gains tax rate is to determine the correct amount of 5-year gains for 2002. Use the worksheet in the 2002 Form 1040 Instructions to determine the correct amount of qualified 5-year gains. Then, enter that amount on line 29 of the 2002 Schedule D. The computation in part IV of Schedule D will produce the correct tax.

Note. Don’t forget the 5-year gains reported in Box 2c of the 2002 Form 1099-DIV (from mutual funds) and on Schedule K-1s from partnerships, S corporations, estates, and trusts. Completing the worksheet can be time consuming on a complex individual return. However, only lower-income taxpayers will be able to benefit from the 8% rate.

The worksheet from the 2001 Form 1040 Instructions is shown below.

Qualified 5-Year Gain Worksheet—Line 29

Keep for Your Records

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Enter the total of all gains that you reported on line 8, column (f), of Schedules D and D-1 from disposions of property held more than 5 years. Do not reduce these gains by any losses.</td>
<td></td>
</tr>
<tr>
<td>2. Enter the total of all gains from disposions of property held more than 5 years from Form 4797, Part 1, but only if Form 4797, line 7, is more than zero. Do not reduce these gains by any losses.</td>
<td></td>
</tr>
<tr>
<td>3. Enter the total of all capital gains from disposions of property held more than 5 years from Form 4684, line 4; Form 6252; Form 6781, Part II; and Form 8824. Do not reduce these gains by any losses.</td>
<td></td>
</tr>
<tr>
<td>4. Enter the total of any qualified 5-year gain reported to you on:</td>
<td></td>
</tr>
<tr>
<td>● Form 1099-DIV, box 2c;</td>
<td></td>
</tr>
<tr>
<td>● Form 2439, box 1c; and</td>
<td></td>
</tr>
<tr>
<td>● Schedule K-1 from a partnership, S corporation, estate, or trust (do not include gains from section 1231 property; take them into account on line 2 above, but only if Form 4797, line 7, is more than zero).</td>
<td></td>
</tr>
<tr>
<td>5. Add lines 1 through 4.</td>
<td></td>
</tr>
<tr>
<td>6. Enter the part, if any, of the gain on line 5 that is:</td>
<td></td>
</tr>
<tr>
<td>● Attributable to 28% rate gain or</td>
<td></td>
</tr>
<tr>
<td>● Included on line 6, 10, 11, or 12 of the Unrecaptured Section 1250 Gain Worksheet on page D-7.</td>
<td></td>
</tr>
<tr>
<td>7. Qualified 5-year gain. Subtract line 6 from line 5. Enter the result here and on Schedule D, line 29.</td>
<td></td>
</tr>
</tbody>
</table>
Caution. Notice the important instruction for lines 1, 2 and 3 on the worksheet. Do not reduce these (5-year gains) by any losses. Enter only 5-year gains from line 8, column (f), of Schedule D. 5-year gains and 5-year losses are not netted in arriving at the figure to enter on lines 1, 2 and 3 of the worksheet. 5-year gains are included. 5-year losses are omitted.

See the Example for line 29, Schedule D in the 2002 Form 1040 Instructions for guidance in completing the worksheet. This Example was shown on page D-8 in the 2001 Form 1040 Instructions. It provides a thorough analysis for a complex individual return.

Question 4. My client sold an apartment building in 1998 on the installment method. The building had been purchased in 1990. The installment payments are to be paid over a 15-year period. They received a $17,000 payment in 2001. The gross profit percentage is 52.049%.

They use Form 6252 to report the gain each year. Will the 2001 taxable portion of the gain be eligible for the lower 8% capital gain rate as computed in Part IV of the 2001 Schedule D?

Note. The following example demonstrates a somewhat common situation of an existing installment sale of real property which could qualify for 8% treatment.

Answer 4. Yes. See the qualified 5-year gain worksheet shown previously in Answer 3. Line 3 of the worksheet states, “enter the total of all capital gains from dispositions of property held more than five years from……………Form 6252.” Since the apartment building was purchased in 1990 and sold in 1998, it met the more than 5-year test.

However, it is unlikely that any of the taxable installment sale amount will be a capital gain in 2001. The reason is that the amount of I.R.C. §1231 gain on each installment payment must be treated as unrecaptured I.R.C. §1250 gain until the total I.R.C. §1250 gain has been recaptured.

Example. The following example illustrates Answer 4.

A. The owners of the apartment building are a husband and wife (Earl and Janet) who filed a joint 2001 return. Their 2001 taxable income was $75,000, which gives them a top tax bracket of 27.5%.

B. The taxable amount of the installment sale, $8,848 (line 26, Form 6252) is taxed at a 25% rate in 2001 as unrecaptured I.R.C. §1250 gain. This is the maximum tax rate allowed for unrecaptured I.R.C. §1250 gain.

C. The total unrecaptured I.R.C. §1250 gain on the sale of the apartment building is $81,660, the total MACRS deductions on it from 1990 through the date of sale in 1998.

D. The amount of unrecaptured I.R.C. §1250 gain remaining to be reported in 2001 is $57,197 computed as follows:

\[
\text{Total unrecaptured I.R.C. §1250 gain (due to MACRS)} = 81,660 \\
\text{Less: Unrecaptured I.R.C. §1250 gain reported in years 1998–2000} = (47,000 \times 52.049\%) = 24,463 \\
\text{Amount remaining to be reported in 2001} = 57,197
\]

E. Earl and Janet had $2,400 of capital gain distributions in 2001, $850 of which was identified as 5-year gain in box 2c of their 2001 Forms 1099-DIV.

F. If Earl and Janet’s 2001 taxable income had been within the 15% tax bracket, the $8,848 unrecaptured I.R.C. §1250 gain would have been taxed at 15% rather than at the maximum 25% rate.
**G.** The completed forms and schedules follow:

1. The 2001 Form 6252. **Note that even though the installment sale of the apartment building occurred in 1998, Part I of Form 6252 is completed to give the necessary facts.**

2. Part I of the 2001 Form 4797.

3. The Unrecaptured I.R.C. §1250 Gain Worksheet from the 2001 Form 1040 Instructions (shown on page D-7).

4. The 2001 Schedule D.

5. The Schedule D Tax Worksheet from the 2001 Form 1040 Instructions (shown on page D-9).

---

### Form 6252

**Description of property:** Apartment building

**Identification number:**

1. **Date acquired (month, day, year):** 1/14/90
2. **Date sold (month, day, year):** 3/10/98
3. **Was the property sold to a related party after May 14, 1980?** Yes
4. **Was the property you sold to a related party a marketable security?** No

#### Part I: Gross Profit and Contract Price

If the property described on line 1 above was your main home, enter the amount of your excluded gain. Otherwise, enter -0-

For Answer 4

### Unrecaptured Section 1250 Gain Worksheet—Line 19

Keep For Your Records

If you are not reporting a gain on Form 4797, line 7, skip lines 1 through 9 and go to line 10.

1. If you have a section 1250 property in Part III of Form 4797 for which you made an entry in Part I of Form 4797 (but not on Form 6252), enter the smaller of line 22 or line 24 of Form 4797 for that property. If you did not have any such property, go to line 4. If you had more than one such property, see instructions.

2. Enter the amount from Form 4797, line 26g, for the property for which you made an entry on line 1.

3. Subtract line 2 from line 1.

4. Enter the total unrecaptured section 1250 gain included on line 26 or line 37 of Form(s) 6252 from installment sales of trade or business property held more than 1 year (see instructions).

5. Enter the total of any amounts reported to you on a Schedule K-1, Form 1099-DIV, or Form 2439 as “unrecaptured section 1250 gain” (see instructions).

6. Add lines 3 through 5.

7. Enter the smaller of line 6 or the gain from Form 4797, line 7.

8. Enter the amount, if any, from Form 4797, line 8.

9. Subtract line 8 from line 7. If zero or less, enter -0-.

10. Enter the amount of any gain from the sale or exchange of an interest in a partnership attributable to unrecaptured section 1250 gain (see instructions).

11. Enter the total of any amounts reported to you on a Schedule K-1 from a partnership or an S corporation as “unrecaptured section 1250 gain” (see instructions).

12. Enter the total of any unrecaptured section 1250 gain from sales (including installment sales) or other dispositions of section 1250 property held more than 1 year for which you did not make an entry in Part I of Form 4797 for the year of sale (see instructions).

13. Add lines 9 through 12.

14. Enter the gain or (loss) from Schedule D, line 18.

15. Enter the (loss), if any, from Schedule D, line 7. If Schedule D, line 7, is zero or a gain, enter -0-.

16. Combine lines 14 and 15. If the result is a zero or a gain, enter -0-. If the result is a (loss), enter it as a positive amount.

17. Unrecaptured section 1250 gain. Subtract line 16 from line 13. If zero or less, enter -0-. Enter the result here and on Schedule D, line 19.

Complete this worksheet only if line 15 or line 19 of Schedule D is more than zero. Otherwise, complete Part IV of Schedule D to figure your tax. Exception: Do not use Schedule D, Part IV, or this worksheet to figure your tax if line 16 or line 17 of Schedule D or Form 1040, line 39, is zero or less; instead, see the instructions for Form 1040, line 40.

1. Enter your taxable income from Form 1040, line 39.
2. Enter the smaller of line 16 or line 17 of Schedule D.
3. If you are filing Form 4952, enter the amount from Form 4952, line 4e. Otherwise, enter 0. Also enter this amount on Schedule D, line 22.
4. Subtract line 3 from line 2. If zero or less, enter 0.
5. Combine lines 7 and 15 of Schedule D. If zero or less, enter 0.
6. Enter the smaller of line 5 above or Schedule D, line 15, but not less than zero.
7. Enter the amount from Schedule D, line 19.
8. Add lines 6 and 7.
9. Subtract line 8 from line 4. If zero or less, enter 0.
10. Subtract line 9 from line 1. If zero or less, enter 0.
11. Enter the smaller of:
   - The amount on line 1 or $45,200 if married filing jointly or qualifying widow(er);
   - $27,050 if single;
   - $36,250 if head of household; or
   - $22,600 if married filing separately.
12. Enter the smaller of line 10 or line 11.
13. Subtract line 4 from line 11.
14. Enter the larger of line 12 or line 13.
15. Subtract line 14 from line 11. Use the Tax Table or Tax Rate Schedules, whichever applies.
16. Subtract line 12 from line 11.
17. Enter your qualified 5-year gain, if any, from line 7 of the worksheet on page D-8.
18. Enter the smaller of line 22 or line 19.
19. Multiply line 18 by 8% (.08).
20. Subtract line 18 from line 16.
21. Multiply line 20 by 10% (.10). If lines 1 and 11 are the same, skip lines 22 through 34 and go to line 22. Otherwise, go to line 22.
22. Enter the smaller of line 1 or line 9.
23. Enter the amount from line 16 (if line 16 is blank, enter 0).
24. Subtract line 23 from line 22. If zero or less, enter 0.
25. Multiply line 24 by 20% (.20).
26. Enter the smaller of line 26 through 31 and go to line 27. Otherwise, go to line 26.
27. Add lines 4 and 14.
28. Subtract line 1 from line 11.
29. Subtract line 28 from line 27. If zero or less, enter 0.
30. Subtract line 29 from line 26. If zero or less, enter 0.
31. Multiply line 30 by 25% (.25).
32. Add lines 14, 16, 24, and 30.
33. Subtract line 32 from line 1.
34. Multiply line 33 by 28% (.28).
35. Add lines 15, 19, 21, 25, 31, and 34.
36. Figure the tax on the amount on line 1. Use the Tax Table or Tax Rate Schedules, whichever applies.
37. Tax on all taxable income (including capital gains). Enter the smaller of line 35 or line 36. Also enter this amount on Schedule D, line 40, and Form 1040, line 40.
**CHARITABLE DONATIONS**

Question 5. I have a client who regularly donates appreciated stock to her church. She owns a lot of EE bonds. Can she give the EE bonds to the church and claim a contribution deduction equal to the value of the bonds at the date of the gift?

Answer 5. Yes, but there is a big tax trap involved. Your client cannot avoid taxation on the accrued interest on the EE bonds when she donates them. Also, tax may not be deferred by first converting the EE bonds to HH bonds and then donating them to the church. When E, EE, HH, or I bonds are donated to a charity, the donor should generally include all of the previously unreported accrued interest as taxable income. This assumes that the accrued interest has not been reported annually. In summary, our recommendation is that your client continues to give appreciated stock held more than one year to her church rather than EE bonds.

Note. The taxable interest will increase AGI and may cause Social Security benefits to be taxable and could create phase-out issues.

**DEDUCTING STUDENT LOAN INTEREST**

Facts. My client, Marsha, is a divorced mother of a college student (daughter Sarah) who she is entitled to claim as a dependent. In 2000, Marsha established an education loan in her own name to help pay for Sarah’s college expenses. In 2001, Marsha’s AGI will be about $50,000. She will not be able to deduct much of the $3,000 of 2001 student loan interest she pays on line 24, Form 1040 due to the AGI phase-out rules. Marsha does not itemize deductions.

Question 6. It appears that with similar facts in 2002, Marsha will be able to deduct most of her student loan interest on her 2002 single return. Am I interpreting this correctly? (Shown on page 503 in the 2001 Farm Income Tax Workbook).

Answer 6. Yes. The 2001 Act significantly increased the modified AGI phase-out ranges for deducting student loan interest beginning in 2002. If Marsha’s 2002 modified AGI is under the phase-out ceiling of $50,000 for single taxpayers, she will be entitled to deduct up to $2,500 of student loan interest on line 24 of her 2002 Form 1040. See Chapter 8: Education Provisions for more details on the expansion of the deduction for student loan interest.

Regarding the New Student Loan Interest Rules Beginning in 2002 and Miscellaneous Information

1. The new modified AGI phase-out ranges for 2002 are:

<table>
<thead>
<tr>
<th>Filing Status</th>
<th>2002 Modified AGI Phase-out Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Single</td>
<td>Begins at $50,000. Fully effective at $65,000.</td>
</tr>
<tr>
<td>b) Joint</td>
<td>Begins at $100,000. Fully effective at $130,000.</td>
</tr>
</tbody>
</table>

2. Many taxpayers who previously received qualified student loans for their college dependents have used home equity loans. That tax planning is logical, provided the taxpayer itemizes deductions. But for taxpayers with facts similar to Marsha, the new student loan deductions rules beginning in 2002 may provide a better option.

3. Form W-9S is used to certify to a lender that all the proceeds of a loan are to be used for qualified education expenses. The lender will report interest of $600 or more on Form 1098-E. A taxpayer may make a binding election for the current year and all future years to treat a home equity loan as unsecured debt that does not qualify as home mortgage interest under Reg. 1.163-10T(o)(5).

4. Student loan interest rates were adjusted July 1, 2002. They are now at their lowest level in history. The rates fell to 3.46% – 4.06% depending on the type and date of the loan.

5. Approximately 64% of all students borrow to finance their college costs. The average loan balance as of July 1, 2002 was $16,928 for graduates.
2002 Workbook

Chapter 13: Practitioner Q and A

DEEMED SALE ELECTION ON 2001 RETURNS

Question 7. My client has a large capital loss carryover to 2001. He owns several residential rental properties, which have appreciated. I know he can make the deemed sale election to report phantom paper gains on the rental buildings. My question is: Is the increase in basis resulting from this deemed sale election on January 1, 2001 eligible for MACRS depreciation?

Answer 7. This is another great question. Some may argue that because there is no cash outlay, no depreciation is allowable. However, I.R.C. §311(e) of the Taxpayer Relief Act of 1997 provides that when the election is made, the property is treated as sold for an amount equal to FMV and reacquired for an amount equal to FMV. If the deemed sale...
election is made for a residential rental property, a sale is reported on Form 4797, and gain (including any applicable depreciation recapture) is taxable. The deemed reacquisition establishes a new basis, and depreciation should begin again using the new basis. MACRS generally would apply. Even if the prior placed-in-service date was pre-1987, residential rental property is not excluded from MACRS under the related-party acquisition rules (page 8 of IRS Pub. 946).

Therefore, the unofficial answer to your question is yes.

DEPRECIATION OF SOFTWARE

Question 8. I bought a large computer system consisting of hardware and software for $30,000. The software cost $10,000 and came from a different vendor than the hardware company. The hardware company installed the software, paid the software company, and billed me for one total amount of $30,000. May I treat the $10,000 software cost as a separate item and depreciate it over three years?

Answer 8. Yes, as long as the $10,000 cost of the software is separately stated on the $30,000 invoice. Computer software is depreciated over a 36-month period using the straight-line method [Treas. Reg. §1.167(a)-14(b)(2)].

Note. Refer to Chapter 1: New Tax Legislation for details on the special 30% depreciation allowance.

DIVORCE

Question 9. I prepare the returns of a divorced mother and her two sons who live with her. She has not remarried and says she never will. When preparing Form 8615 (Tax for Children Under Age 14 Who Have Investment Income of More Than $1,500), what should be entered on line 6 (parent’s taxable income)? The boys’ father is very reluctant (putting it mildly!) to furnish me with a copy of his return.

Answer 9. Where parents are legally separated or divorced, use the return of the parent who has custody of the child for the greater part of the year for line 6 entry purposes. We assume, that with the facts given, you will enter the mother’s taxable income on line 6 of Form 8615.

Note. The Instructions for Form 8615 are not very thorough. For a complete explanation of how to prepare the form, see IRS Pub. 929, Tax Rules for Children and Dependents. Also see pages 351-366 in the 1999 Farm Income Tax Workbook for excellent coverage including completed forms, schedules, and worksheets. If the tax professional lacks computer software that prepares Form 8615, it will be a time consuming task. This is especially true if the children have capital gain income.
Form 8615

Tax for Children Under Age 14
With Investment Income of More Than $1,500

Attach only to the child's Form 1040, Form 1040A, or Form 1040NR.
See separate instructions.

Chapter 13: Practitioner Q and A

Copyrighted by the Board of Trustees of the University of Illinois.
This information was correct when originally published. It has not been updated for any subsequent law changes.
EXCLUSION OF SERIES EE BOND INTEREST

**Facts.** Grandparents bought a grandchild Series EE U.S. savings bonds in the early 1980s when interest rates were high. The bonds are in the name and social security number of the grandchild. The grandchild began college in August 2001 and some of the bonds were cashed to pay for college expenses.

**Question 10.** Can the grandchild use Form 8815 (Exclusion of Interest From Series EE and I Savings Bonds Issued After 1989) to exclude interest on his single 2001 tax return? The grandchild has about $15,000 of 2001 wages and quite a bit of investment income including the EE bond interest.

**Answer 10.** No. The exclusion on Form 8815 is not available for bonds bought in the name of a child or grandchild who is under age 24 by a parent or a grandparent. See the Instructions for Form 8815.

**Note.** See pages 159-166 in the 2001 Farm Income Tax Workbook for a thorough analysis of this interest exclusion provision.

FOSTER CARE

**Question 11.** An instructor mentioned that foster care payments received from the state are excludable. However, I have a client who received a Form 1099-MISC from the state of Illinois for a physically handicapped foster child. What should I do in this situation?

**Answer 11.** Based on the facts that your client cared for only one handicapped foster child, it appears the state of Illinois issued the Form 1099-MISC in error. If so, attach a statement to the return explaining that the 1099 amount should not be reported as income is not taxable. Following is an excerpt from IRS Pub. 525, Taxable and Nontaxable Income.

*Foster-Care providers. Payments you receive from a state or tax-exempt child-placement agency for providing care to qualified foster individuals in your home generally are not included in your income. However, you must include in your income payments received for the care of:*

- More than five individuals age 19 or older, and
- Certain difficulty-of-care payments.

*Difficulty-of-care payments. These are additional payments that are designated by the payer as compensation for providing the extra care that is required for physically, mentally, or emotionally handicapped foster individuals.*

*You must include in your income difficulty-of-care payments received for more than:*

- 10 qualified foster individuals under age 19, or
- Five qualified foster individuals age 19 or older.

**Note.** Some taxpayers care for more than five foster individuals. The result is that the foster-care payments for the sixth qualified foster individual and up that are 19 or older must be reported on Schedule C.

**Note.** See Chapter 1: New Tax Legislation for some minor changes made to foster care payments for 2002 and later tax years.
HOME REFINANCING

Question 12. Regarding refinancing a home mortgage: If a lender charged a “refinancing fee” or “origination fee” that has no relation to the loan amount, can this fee be treated as “points” and amortized over the life of the loan?

Answer 12. No. This “refinancing fee” would be neither deductible nor amortizable on Schedule A. According to IRS Pub. 936, Home Mortgage Interest Deduction, “points” must meet these tests:

- The points were not paid in place of amounts that ordinarily are stated separately on the settlement statement, such as appraisal fees, inspection fees, title fees, attorney fees, and property taxes.
- The points were computed as a percentage of the principal amount of the mortgage.
- The amount is clearly shown on the settlement statement (usually the Form HUD-1) as points charged for the mortgage.

Note. See pages 295-97 in the 2001 Farm Income Tax Workbook for comprehensive coverage of home refinancing tax issues.

HYBRID ELECTRIC VEHICLE

Question 13. Your book (Example 1 on page 318 in the 2001 Farm Income Tax Workbook) shows that a taxpayer who buys a new HEV (hybrid electric vehicle) is entitled to only a $1,000 “Clean-Fuel” deduction on line 32 on his/her 2001 Form 1040. I think the maximum $2,000 deduction is more appropriate. It would seem to me that the cost of the battery system in HEVs would easily be at least $2,000. Could you comment?

Answer 13. The IRS has certified the first hybrid gas-electric automobile as being eligible for the clean-burning fuel deduction under a procedure for automobile manufacturers, Rev. Proc. 2002-52, I.R.B. 2002-24. Purchasers of a new Toyota Prius for model years 2001, 2002 and 2003 will be able to claim a deduction of $2,000, the maximum amount of the one-time deduction, for the year that the vehicle was first put into use.

Individuals take the benefit as an adjustment to income and need not itemize deductions on tax returns to claim it. Taxpayers may claim the deduction for a past year by filing an amended return.

Example. Marsha bought a 2003 Honda Civic Hybrid sedan on July 30, 2002 for $21,300 (including state sales tax). The car is used 100% for personal use, including commuting. If Honda certifies that the cost of the electric power system in the vehicle is $3,700, Marsha will be entitled to a $2,000 “clean-fuel” deduction on line 34 on her 2002 Form 1040 as shown below.
Facts regarding H.E.V.s:

1. Toyota received IRS certification in late July 2002 that the 2001, 2002 and 2003 models of its Prius autos qualify for the $2,000 clean-fuel deduction.

2. The Honda Insight (all models) and the 2003 Honda Civic Hybrid sedan also qualify for the $2,000 clean-fuel deduction.

3. Sole proprietors must claim the clean-fuel deduction on business use vehicles on the Other Expenses line on Schedules C or F. If the vehicle is used partly for personal use, the $2,000 deduction is split between either Schedules C or F and line 34 on the 2002 Form 1040 (as shown above).

4. Other individuals, including employees who use the vehicle partly for business purposes, claim the entire $2,000 clean-fuel on line 34 on the 2002 Form 1040 (as shown above).

5. Only initial purchasers are entitled to the $2,000 clean-fuel deduction. The deduction is not allowed for the cost of used vehicles.

INHERITED IRA

Question 14. Is there any time limit on when a surviving spouse can elect to treat her deceased husband’s IRA as her own? For example, assume the wife has already received distributions from her late husband’s IRA based on his age. Is it too late for her to roll over the balance in his IRA into an IRA in her own name?

Answer 14. The answer to your last question is no, it is not too late [Treas. Reg. §1.408-8(A5)]. The only restriction on making the election to treat an inherited IRA as his/her own is that the surviving spouse must be the sole beneficiary of the deceased spouse’s IRA.

The election by a surviving spouse to treat an inherited IRA as his/her own is generally a good idea if:

• the surviving spouse is younger than the deceased spouse who owned the IRA, and
• deferral of income is an objective.

Even if the surviving spouse is over 70½ when the IRA owner dies, treating the inherited IRA as his/her own may be a good idea. The surviving spouse can do this and name his/her own beneficiary. The result is smaller distributions from the new IRA compared to taking distributions from the deceased’s IRA as beneficiary.

Note. See Chapter 7: Retirement for more details on this strategy.

INHERITED STOCK

Question 15. Do inherited stocks sold at a gain by the heir automatically qualify as 5-year gains?

Answer 15. This is a great question. The answer is no. I.R.C. §1223 governs holding periods. Under I.R.C. §1223, the basis of inherited property is not a transferred basis. Instead, it is adjusted to the FMV as of the valuation date. Because the basis does not transfer, the decedent’s holding period does not transfer. Therefore, the heir would need to hold the inherited stock for more than five years from the decedent’s death in order to qualify any gain on its sale as a 5-year gain.
INTEREST DEDUCTION

Question 16. My client borrowed $100,000 to purchase S corporation common stock. Is the interest on the loan deductible on page 2 of Schedule E? Or is it considered investment interest reportable on Form 4952?

Answer 16. According to IRS Pub. 535, Business Expenses, it depends on the assets owned by the S corporation at the time the stock is purchased. If all of the assets of the S corporation are business assets, the loan interest is deductible in Part II, Schedule E as business interest. However, if some of the assets are investment assets like securities and some of the assets are business assets, an allocation must be made of the interest paid. The portion of the interest allocated to purchase of securities owned by the S corporation would be considered investment interest.

Example. Ann borrowed $100,000 from a bank in 2000 to buy 50% of the stock in ABC Corporation, an S corporation. At the time of the stock transaction, all of the corporation’s assets were business-related assets, such as the following:

- Inventory
- Accounts receivable
- Equipment
- Goodwill
- Cash in an operating checking account

Ann paid $6,000 of interest to the bank in 2002 on the loan. The 2002 Schedule K-1 from ABC Corporation reported ordinary income from trade of business activities on line 1 of $32,000. She materially participated in the activities of the corporation in 2002. Ann’s 2002 Part II, Schedule E is shown below.

```
Schedule E (Form 1040) 2002

Ann

Note. If you report amounts from farming or fishing on Schedule E, you must enter your gross income from those activities on line 41 below. Real estate professionals must complete line 42 below.

Part II Income or Loss From Partnerships and S Corporations Note. If you report a loss from an at-risk activity, you must check either column (e) or (f) on line 27 to describe your investment in the activity. See page E-5. If you check column (f), you must attach Form 6198.

<table>

</tbody>
</table>

The format shown above is explained on page 17 of IRS Pub. 535, Business Expenses (For use in preparing 2001 returns). This rationale also applies to loans used to buy partnership interests. However, it does not apply to loans used to buy stock in a C corporation as explained in the Note on the following page.
Note. If Ann had bought C corporation stock rather than S corporation stock in 2000, her $6,000 interest paid in 2002 would be investment interest. The $6,000 would be reported on line 1 of Part I on her 2002 Form 4952 (investment interest expense paid or accrued in 2002). In that case, Ann could have avoided the potential limitation of the investment interest rules if she had borrowed the $100,000 as a home equity loan. See page 244 in the 1997 Farm Income Tax Workbook for more details.

INTERNET SALES

Question 17. I have a client who buys items on eBay with the intention of reselling them for profit. He has made several hundred purchases and sales to date (as November 30, 2001) in 2001. How should this activity be reported on his 2001 tax return?

Answer 17. Your client is in a unique retail Schedule C activity. An ending inventory for December 31, 2001 must be determined. Hopefully, your client keeps accurate records. If not, your tax preparation fee might not exactly please your eBay-minded client.

Note. In a news release dated June 2002, eBay announced that the company would offer group health insurance coverage to its “power sellers.” eBay’s CEO stated, “Many power sellers are self-employed eBay merchants. That leaves our family entrepreneurs at a serious disadvantage when it comes to acquiring healthcare coverage for their families.” To qualify for this perk, an eBay merchant must be registered with the company’s Power Seller program and sell between $2,000 and $25,000 per month on the web site. eBay estimates that 100,000 or more of its merchants currently qualify using these standards.

IRA Rollovers

Question 18A. It appears that an IRA can be rolled over to a tax-sheltered annuity [I.R.C. §403(b)] plan for school teachers. Is this correct?

Question 18B. If so, can an individual contribute to an IRA, later roll it over to an I.R.C. §403(b) plan, and take advantage of the I.R.C §403(b) loan provisions?

Answer 18. The answer to both questions is yes, beginning in 2002. This is referred to as the “portability feature” for qualified retirement plans, a provision of the Economic Growth and Tax Relief Reconciliation Act of 2001. There is one restriction:

- After-tax contributions, including nondeductible IRA contributions, are not permitted to be rolled over from an IRA into a qualified plan, an I.R.C. §403(b) plan, or an I.R.C. §457 plan (for state and local government and certain tax-exempt organization employees). Also some state retirement plans have additional restrictions.

Note. See page 508 in the 2001 Farm Income Tax Workbook for more details.
MINIMUM REQUIRED DISTRIBUTIONS

Question 19. Should a single taxpayer (80-year old surviving husband) who will potentially have significant estate tax liability take more than the minimum required distributions from his $500,000 plus IRA?

Answer 19. This strategy should certainly be considered. Retirement plan assets are taxed twice, once as an asset of the estate and again to the beneficiaries who inherit the plan and take distributions. The combined estate and income taxes could be astronomically high. For example, if the estate tax rate on the date of death value of the plan was 37% and the beneficiary is in the 35% income tax bracket when a plan distribution is received, the combined tax rate would be 72%!

Note. See Chapter 2: Individual Taxpayer Problems for an example of how this tax problem can be mitigated by creating a Charitable Remainder Trust (CRT).

S CORPORATION SHAREHOLDER LOANS

Question 20. An S corporation has a large loss in its initial year of business in 2001. An 80% shareholder borrowed $150,000 in his own name from a bank and then lent $110,000 to the S corporation. This occurred in 2001. Can he deduct his $90,000 portion of the S corporation’s 2001 distributive loss on his 2001 Schedule E?

Answer 20. Yes. Direct loans from an S shareholder to the corporation increase the shareholder’s basis. With the facts given, the shareholder’s $110,000 direct loan to the S corporation in 2001 should permit a full deduction of the shareholder’s 2001 $90,000 distributive loss.

Caution. The guarantee of an S corporation loan by a shareholder does not immediately increase shareholder basis. This issue has been litigated frequently, with IRS prevailing in the vast majority of court cases. See pages 239-44 in the 2000 Farm Income Tax Workbook for more information on this topic.

SELF-RENTAL RULE AND PASSIVE LOSSES

Regarding the self-rental rule as it pertains to the passive loss limitation rules under I.R.C. §469:

Facts. An incorporated (C corporation) dentist owns his dental practice building individually and rents it to his corporation for an $80,000 profit. He materially participates in the dental C corporation.

He has one other passive loss, a $100,000 rental loss from a 50% ownership in an outlet mall building. According to the self-rental regulation [Treas. Reg.§1.469-2(f)(6)], the rental profit on the dental building is treated as nonpassive.

Question 21. Could he give the dental building to his wife and then take the position that future rental profits from it could be treated as passive?

Answer 21. No. There is a court case with similar facts. See the Michael F. and Jane H. Connor Appeals Court case (CA-7, 2002-2 USTC ¶50,560 reported July 5, 2000). A brief analysis of the initial Tax Court case can be found on page 607 of the 1999 Farm Income Tax Workbook.

Excerpt from the 7th Circuit Appeals Court Opinion

Rental activities are expressly included as passive activities, but if a taxpayer participates materially in an entity involved in the rental of property, the proceeds from that rental may be deemed to arise from a non-passive activity. Passive activity rules apply to personal service corporations. For purposes of determining whether a taxpayer materially participates in an activity, participation of his spouse will be included as participation of the taxpayer.
DID YOU KNOW?

1. A record number of Americans now own vacation homes. The number of second homes in the U.S. has increased dramatically from 1.7 million in 1980 to 4.1 million in 2001. This trend has been aided in 2002 by low mortgage interest rates and stock market gloom. Expect more vacation home tax issues when you prepare 2002 tax returns. See pages 92-97 in the 1997 Farm Income Tax Workbook for information on this topic. The tax rules have not changed since 1997.

2. The interest rate on U.S. Series I savings bonds fell to 2.57% for bonds issued after April 30, 2002 and before November 1, 2002. For I Bonds issued between May 1, 2001 and October 31, 2001, the interest rate is 3.57% for the 6-month period ending October 31, 2002. A better current alternative for savings bond investors is the Series EE bond. The interest rate on EE bonds (renamed Patriot bonds) is 3.96% for bonds issued between May 1, 2002 and October 31, 2002.

3. High-income taxpayers pay a disproportionate share of the total tax burden. According to 1999 data from the IRS, the top 5% of 1999 tax filers paid 55.5% of total federal individual income taxes, up from 43.4% for 1991. Their share of total 1999 AGI was 34%. To rank in the top 5% for 1999, AGI was $120,846 or higher. The Tax Foundation attributes the trend to:
   - a strong economy in the 1990s;
   - new 36% and 39.6% tax rates approved in 1993; and
   - phase-out of exemptions, itemized deductions, and other targeted tax breaks for high income taxpayers.

Agriculture-Related Questions and Answers

8% CAPITAL GAIN TAX RATE

Question 22. Regarding 5-year gains (reported on line 29, Part IV of Schedule D) and the 8% capital gain rate:

For raised cows reported in Part I of Form 4797, how does a preparer determine whether they have been held for more than five years? If they have been and if the farmer’s taxable income is within the 15% bracket, the gain on the raised cows would be entitled to the favorable 8% rate.

Answer 22. We assume that many, if not most, farmers who have a cow/calf herd keep records of each animal, perhaps by using ear tags. If not, we assume that in an IRS exam situation, the burden of proof would be on the taxpayer to prove the accuracy of the line 29, Schedule D qualified 5-year gain figure.

CHARITABLE DONATIONS OF GRAIN

Question 23. Is there any tax consequence to a farm C corporation that annually donates grain to the sole shareholder’s church? The corporation is on the cash basis.

My analysis is that the answer to my question is no since:
   - the donated raised grain has a zero basis to the corporation, and
   - therefore, the corporation’s charitable contribution deduction is zero.

Answer 23. You correctly answered your question and your analysis is correct provided that the gifted grain was produced in the corporation’s previous taxable year.
The original authority for this conclusion is Rev. Rul. 55-531. However, if the raised grain is donated to the church in the **tax year in which the grain is produced**, the Rev. Rul. provides that:

- The costs applicable to producing the donated grain are not deductible by the donor as a business expense.

Rev. Rul. 55-531 provides an IRS examiner with authority to disallow all direct and indirect costs of producing gifted grain by an operating farmer if the grain is donated in the same year it is produced. The disallowed expenses become a cost basis of the gifted grain which can be deducted as a contribution on Schedule A if the operating farmer itemizes deductions.

**Note.** The rationale of Rev. Rul. 55-531 was recently incorporated in the Treasury Regulations. See Treas. Reg. §1.170-1(c)(4) and Example (5).

**Caution.** Different rules apply to farm landlords as opposed to operating farmers. Landlords receive rental income which cannot be assigned without income recognition. Crop shares received by a landlord which are given to others are considered converted to money when the gift is made. Therefore, the fair market value of the donated crop shares on the date of the gift must be reported as income, even though someone else receives payment for the crop shares. *(Farmer's Tax Guide For Use in Preparing 2001 Returns, page 16. The authority is Rev. Rul. 75-11, 1975-1 CB 27). As a result, there is generally no tax incentive for a crop share landlord to donate crop shares either to a charity or to family members as rental income is immediately recognized.*

**FORCED SALE OF FARMLAND**

**Question 24.** A court orders heirs of an estate to sell the farmland at auction. One of the heirs purchases the land at 150% of the estate tax return FMV. Which entity pays the tax on the capital gain?

**Answer 24.** The capital gain is taxable to the estate. We don’t know why the estate tax value and the sales price are so different. There could be valid reasons why the two figures are so far apart. However, if there are no valid reasons and if the estate tax liability was small or zero, filing an amended Form 709 to increase the value of the land may be a wise move.

**Question 25.** Is there a capital gain on the purchaser’s inherited land?

**Answer 25.** The following advice is given based on the limited facts presented. The buyer would want to structure the transaction so that he/she bought only the portion of the land not inherited. We are certain that is what would be done since the purchasing heir already owns his/her portion of the land. Thus, he/she would buy only the land inherited by the other heirs.

**LIMESTONE ROYALTY PAYMENTS**

**Question 26.** A farm landlord client inherited 120 acres of farmland on which limestone is located. The quarry company has already made over $80,000 of royalty payments to him in 2001. How should I report this income on the 2001 return?

**Answer 26.** Since your client is receiving royalty payments, he has retained an economic interest in the limestone. Therefore, the amount of his payments depends on the amount of limestone removed. The royalty payments are reported in Part I, Schedule E. Percentage depletion is allowed as follows:

1. Depletion rate for limestone used as agricultural lime 14%
2. Depletion rate of limestone used as road material (often called riprap) 5%
**Example.** Amber received the following limestone royalty payments in 2002 from Highview Stone Company:

1. $65,000 for limestone used for agricultural lime
2. $13,000 for limestone used for road riprap

### Computation of Allowable Percentage Depletion for 2002

- 2002 Form 1099-MISC from Highview Stone Company
- Information sheet sent by Highview Stone Company
- Amber’s completed 2002 Schedule E
For Answer 26

IMPORTANT INFORMATION — KEEP FOR YOUR 2002 INCOME TAX RECORDS

To: All landowners who received limestone royalty payments from Highview Stone Company in 2002
From: Highview Stone Company
Date: January 31, 2003
Topic: Tax treatment of limestone royalty payments

According to our records, you received a total of $78,000 of limestone royalty payments in 2002. This total is comprised of:

- Payment for limestone used for agricultural purposes $65,000
- Payment for limestone used for highway construction $13,000

According to IRS rules and regulations, it is our understanding that you are allowed a percentage depletion rate of 14% for ag limestone royalties and 5% for highway construction limestone royalties.

Please consult your tax advisor for more details on this topic. We suggest you give this information sheet along with the enclosed 2002 Form 1099-MISC to your tax preparer. If you have questions about this, please contact Jane Doe in our accounting office. Her phone number is (111) 111-1111. Her fax number is (111) 111-1110.
### Supplemental Income and Loss

**Part I Income or Loss From Rental Real Estate and Royalties**

Note: If you are in the business of renting personal property, use Schedule C or C-EZ (see page E-1). Report farm rental income or loss from Form 4835 on page 2, line 39.

| 25 | Losses. Add royalty losses from line 22 and rental real estate losses from line 23. Enter total losses here. If Parts II, III, IV, and line 39 on page 2 do not apply to you, also enter this amount on Form 1040, line 17. Otherwise, include this amount in the total on line 40 on page 2 | 25 | 25 |

For Paperwork Reduction Act Notice, see Form 1040 instructions.
Regarding Amber’s Schedule E

A. Lines 1 and 2 are to be left blank for royalty property according to Schedule E Instructions.

B. The limestone deposit is located on approximately 40 acres of an 80 acre tract of land. The real estate taxes of $2,400 on the 80 acre tract are allocated as follows:
   1. 50%, or $1,200, to Schedule E.
   2. 50%, or $1,200 to Form 4835 (not shown).

C. Amber paid $3,000 in legal fees to defend a noise pollution suit filed by an adjoining landowner.

D. Amber paid $1,500 for liability insurance on the quarry site.

E. The depletion deduction of $9,750 is limited to 50% of the taxable income from the property figured without the depletion deduction. Amber is not affected by this limitation. The computation of her taxable income limitation is:

   a) Royalties received $78,000
   b) Less: All allowable deductions except depletion $(5,700)
   c) Balance $72,300
      \[ \times \ 50\% \]
   d) Taxable income limitation on Amber’s depletion $36,150

F. Amber would use cost depletion if it exceeded the $9,750 of percentage depletion. However, in most cases, percentage depletion will exceed cost depletion for limestone royalties. See IRS Pub. 535, Business Expenses, for details regarding cost depletion computation.

STOCK BASIS

Question 27. My client bought stock for $10,000 in 1998. It was worth $12,000 on January 2, 2001. If the deemed sale election was made on the 2001 tax return and the stock is sold in 2005, is the basis for computing the 2005 long-term capital gain or loss $12,000?

Answer 27. Yes. If current law does not change, the 2005 tax result is shown below.

   • The gain on the 2005 stock sale (if any) will be taxed at 20% if your client is in the 26% tax bracket or higher in 2005.
   • If your client’s 2005 taxable income (including any gain on the stock sale) is entirely within the 15% tax bracket, any gain will be taxed at 8%.

If your client had waited and sold the stock on or after January 3, 2006, any gain would have been taxed at 18% if your client’s tax bracket was 25% or higher.

TEMPORARY EASEMENT PAYMENTS

Facts. A farmer client received the following from the County Highway Department for granting a temporary 4-month easement on several frontage acres while a bridge replacement project was going on.

   • $2,000 for damages to growing crops (reported as Other Income in Box 3, Form 1099-MISC)
   • $1,500 for the temporary easement (reported as Rents in Box 1, Form 1099-MISC)
The county used my client’s land to build a small temporary shed to store materials. Occasionally, the county parked some construction equipment on the land on the weekends.

**Question 28.** How should these payments be reported on his tax return?

**Answer 28.** Since your client did not grant a permanent (perpetual) easement, the arrangement is not treated as a sale of property. The $1,500 payment for the temporary easement is treated as **ordinary rental income**. It could be reported as either:

- other farm income on line 10, Schedule F, or
- real estate rental in part I of Schedule E.

The $2,000 crop damages should be reported on line 10, Schedule F (Other Income).

**Note.** See Issue 13 in Chapter 4: Agricultural Issues for a complete analysis of how to report the granting of a permanent easement.
